LMCC Endorses UL Revision 7 Extension

(McLean, VA) In a [letter submitted to Kerry McManama](#), General Manager, and John Zaplatosch, Engineering Manager, of Underwriters Laboratories, Inc. (UL), the LMCC endorsed the proposed extension to July 31, 2016 for a review of requirements in the Standards for Intrinsically Safe Apparatus and Associated Apparatus for Use in Class I, II and II, Division 1, Hazardous (classified) Locations, UL 913, 7th Edition. The LMCC took this action after a review of the UL communication dated June 30, 2011, referencing "Subject 913" and subsequent to previous communication to FM Approvals urging reconsideration of implementation of revised 3610 standard as it is applied to land mobile radios.

The Land Mobile Communications Council (LMCC) is a nonprofit association of nineteen organizations that represent the wireless communications interests of public safety, critical infrastructure, business, industrial, transportation, private and common carriers, and manufacturers of wireless communications equipment.
